

MUNICIPALITIES

By becoming a member of Info-Excavation you agree to:

- Protecting your underground infrastructures (electrical, gas, fibre optic, water lines, telemetering, etc.) through proactive interventions.
- Knowing what work is being done in your territory and near your underground infrastructure so that you may assess what the risk of damaging your network is and how such damages could impact delivery of utilities to the population.
- Reducing costs of repair and maintenance work.
- Increasing, on its territory, the issuance and control of excavation licences and associated income.
- Being a responsible corporate citizen, eager in minimizing socio- economic costs related to damages.

TARIFICATION

The total rate is based on two variables:

- The yearly premium based on its population
- Costs associated with the volume of locate requests transmitted to the municipality.

Municipal Members - Rate Structure 2022 -2023

Categories		Introduction rate
Category	Population	New Member
A	0 - 5,000	\$175
B	5,001 - 10,000	\$225
C	10,001 - 20,000	\$275
D	20,001 - 30,000	\$400
E	30,001 - 50,000	\$500
F	50,001 and more	\$650

Info-Excavation provides you with a mapping service at a rate of \$ 70 / h.

Detailed analysis:

Request acknowledged by Info-Excavation : \$3.90

Request transmitted for locating : \$1.80

Engineering request process: \$4

- Increasing, on its territory, the issuance and control of excavation licences and associated income.
- Being a responsible corporate citizen, eager in minimizing socio-economic costs related to damages.

TARIFICATION

The total rate is based on two variables:

- The yearly premium based on its population
- Costs associated with the volume of locate requests transmitted to the municipality.

Case Example for a Typical Municipality

- The yearly premium based on its population (Example: Port Hawkesbury, Nova-Scotia, 3,500 people = \$200).
- Costs associated with the volume of locate request transmitted to the municipality (Example: volume of 496 locate requests = \$1,523. Because this value can vary, there is a provision that provides for a maximum amount. For a city of 3,500 people with a rate of \$0.12 per citizen = \$420).

Therefore, this city would have a maximum annual amount to pay of:

$$\begin{aligned}
 & \$200 \text{ (yearly premium)} \\
 + & \$420 \text{ (maximum cost based on its population)} \\
 = & \mathbf{\$620}
 \end{aligned}$$

- Services will be provided even if the maximum amount is reached.
